

ULTRASONIC CLEANER KIT

\$350.00

The Ultrasonic Cleaner Kit allows cleaning a large variety of inkjet print heads. It is equipped with a pump and an ultrasonic bath. It will work with any low-viscosity cleaning solution. The pump unit will run the solution through a print head, while the ultrasonic tank helps unclog the blocked nozzles by the action of high-frequency sound in the fluid.

TECHNICAL SPECIFICATIONS

Input Voltage	110 / 220 VAC
Power Consumption	50W
Ultrasonic Tank Capacity	700 ml
Max Fluid Flow Rate @ 0 psi	450 ml/min
Nominal Fluid Flow Rate @ 7 psi	175 ml/min
Max Fluid Pressure	15 psi
Nominal Fluid Pressure	7 psi
Ultrasonic Frequency	40 kHz

SUPPORTED PRINT HEADS
